Description

The Research Area – Promoting Innovation and Knowledge at Università Ca' Foscari Venezia invites applications for a fellowship in:

Title: Innovative ecosystems for research exploitation

SSD: SECS-P / 08

Scientific director and tutor: Vladi Finotto

Duration: 12 months

Abstract: In the recent years, the technology transfer policies and activities of universities have become increasingly relevant. The so-called 'entrepreneurial university' is widely recognized as a key player in the economic growth dynamics of regions and nations and as a fundamental enabler of innovative and entrepreneurial ecosystems.

The widening and strengthening of third mission activities require a deep analysis on the universities' organization models, on the way of achieving knowledge transfer objectives and on the involvement of the whole university community. Starting from these considerations, the aim of the project is to analyze how universities are interpreting and implementing the third mission, exploring how internal and external factors influence the entrepreneurial orientation of the university. The aim of the activity is to develop a better understanding of the key factors involved in the design of more effective research exploitation strategies and to define models that take contextual conditions into account.

The research may be carried out in English.

The fellowship is intended to provide the successful candidate with the opportunity to pursue his/her own research while benefiting from the range of expertise at Università Ca' Foscari Venezia.
