Description

The Department of *Economics* at Università Ca' Foscari Venezia invites applications for a fellowship in:

- **Title:**

International Mobility in Higher Education: a study on attractiveness and impact factors of Erasmus projects

- **Academic Discipline or disciplines specifically identified by the call** SECS-P/06;
- **scientific coordinator and tutor:** Prof. Giancarlo Corò
- **duration:** 12 months

abstract:

The aim of the research is to investigate the relationships between the processes of international mobility activated by the Erasmus projects and the territories that are most attractive to university students. The hypothesis underlying the research is that the factors of attractiveness for students are in particular linked to three dimensions: i) reputation of the destination university; ii) economic vitality and international openness of the territories; iii) institutional, environmental and cultural qualities of the host places. The research will start with a review of the economic literature on international student mobility and it will then analyse the main databases on Italian and European Erasmus projects in collaboration with the INDIRE agency, also with the aim of creating a dashboard accessible to students and researchers. The impact analysis will have to consider both the factors of attractiveness and the effects on students' educational pathways.
