Establishes the following:

**Art. 1 - Scope**

1. A public selection is announced to award **1 fellowship** lasting 12 months, with the possibility of renewal within the limits of art. 2 of the Regulations on university research fellowship awarding, which will be subject to a specific contract.

The expected starting date is February 2023

The research fellowship amounts to Euro 24.320,38 per year, gross to the recipient, net of the expenses to be sustained by the employer. The amount may be subject to adjustment in the event of variations in the law.

2. The research fellowship is awarded for the purpose of collaboration with the following research programme of THE NEW INSTITUTE Centre for Environmental Humanities - NICHE:

**Title:** River running free / you know how I feel. Rights of Nature and the sentimental connection with water in Venice and beyond

**Scientific disciplinary sector and/or disciplines specifically identified by the call:** IUS20

**Scientific coordinator and tutor:** Prof. Pietro Daniel Omodeo

**Duration:** 12 months

**Abstract:**

The aim of the project is to assess the suitability and feasibility of the Lagoon of Venice in the context of the Rights of Nature (RoN) legal paradigm.

The research moves towards two goals: creating an understanding of the Lagoon as an entity that could be invested with *legal personhood*, and identifying a pathway and key actors to request RoN for the Lagoon, in concert with other bodies and ways of water around Europe.

RoN can be considered not only as a recognition of the cultural specificity of the people who inhabit a certain area (e.g. the belief in *Pachamama* across the Andes and the Amazon) but can also be adopted in cultures where the supremacy of humans over Nature is seen as the norm, as in traditional Christian / Western Nation States. This paradigm could possibly be expanded to be applied in areas where traditional knowledge and culture do not see the ecosystem as an independent entity, with

**Director**

intrinsic value, just as a *person*. Could man-made law change, adapting to our times of climate catastrophe, through the science-based recognition not only of the dependency of humans on the environment, but *granting rights* to entire ecosystems?

This project aims to begin with an assessment of how RoN were granted in different areas based on traditional cultures, comparing it to the ongoing process in the Mar Menor (Spain). At the same time, a historical research will be undertaken to deepen the traditional relationship of Venetians with the Lagoon that hosts them.

3. The selection aims to ascertain the scientific-professional requirements deemed necessary to carry out the above research activities.
