Description

The Department of Management at Università Ca' Foscari Venezia invites application for one-year fellowship in **The economic, social and environmental evaluation of urban regeneration projects: methodologies and key performance indicators**, under the supervision of prof. Stefano Micelli (SECS-P/08 - Management).

Abstract: Evaluating urban regeneration projects can be done through a variety of analysis and evaluation techniques. Some of the commonly used approaches include cost-benefit analysis, financial feasibility analysis, property value analysis, and environmental and social impact analysis. The latter type of analysis, crucial in this research, evaluates the impact of the project on society and the environment, including effects on employment, quality of life, health, and the natural environment.

The research developed by the grantee will have to review the main economic and financial performance indicators made available in the literature (SROI and multi-criteria) to identify those that best fit the dynamics observed within the BoSS project so as to ensure proper project monitoring, comparability, and effective continuation of the projects over time.

The research may be carried out in Italian and English.

The fellowship is intended to provide the successful candidate with the opportunity to pursue his/her own research while benefiting from the range of expertise at Università Ca' Foscari Venezia.
