Description

The Research Area at Ca' Foscari University of Venice invites applications for a fellowship in:

Title: Digital and Sustainable Transformation of Veneto SMEs
Supervisor Prof. Vladi Finotto
Scientific Sector: Management [ECON-07/A]
Abstract: The twin transition is a strategic step before being a technological one. The implementation of digital transformation strategies and in general the incorporation of digital into business processes tends to generate strong interdependencies and have far-reaching implications. From this point of view, the effective adoption of digital technologies in the company requires an integrated approach capable of developing solutions suited to the prerogatives and operational logic of small-sized companies. In this context, the assignee will be called upon to collaborate in the activity of analyzing the technological maturity of enterprises in the territory and the impact of digital technology on the territorial ecosystem of innovation. The determinants of the adoption of digital and green technologies in the SMEs of the territory and the strategic-organizational implications of the twin transition will be investigated through the qualitative analysis of the strategic configurations of the companies taken into consideration, the current digital equipment of the selected companies and the decision-making and organizational processes underlying the adoption of new digital technologies.

Funding sources: Unioncamere del Veneto

Position's identification code: pid-2024

The research may be carried out in Italian.

The fellowship is intended to provide the successful candidate with the opportunity to pursue his/her own research while benefiting from the range of expertise at Ca' Foscari University of Venice.

Who can apply

Prospective candidates are expected to hold a master's degree in Economical-Managerial field or Social Sciences and a scientific-professional curriculum suitable for carrying out research activities. or related disciplines.
