The Department of Economics of Ca' Foscari University of Venice, having regard to the resolution of the Consiglio di Dipartimento of 29 November 2019 establishing the research programmes for awarding of the short fellowships in "**Climate Risk, ESG factors and Financial Stability**" lasting 12 months, with the possibility of renewal within the limits of art. 4 of the Regulations for awarding of university short research fellowships.

The expected starting date is on January 2020.

The research fellowship is awarded for the purpose of collaboration with the following research programme of the Department of Economics.

**Abstract:**

Extreme events due to climate change and environmental related factors (ESG) can heavily affect the economic system. Within the last decades, growing awareness about their impact on the society has urged governments and policy authorities to modify the regulatory framework assuming new initiatives such as the Paris Agreement in 2015. Thus far, literature has mainly focused on spillovers between financial and macroeconomic factors ignoring the risk of climate change and environmental related factors on the stability of the financial system. The purpose of this research project is to fill this gap and realize a monitoring system which includes those factors as a potential source of systemic risks.
