- **funding** – PNRR_PE8-AGE-IT – CUP: H73C22000900006, Responsible Prof.ssa Agar Brugiavini
- **start of the programme**: The research programme envisages the start of the activity approximately in January 2025.

Description

PROFILE 1 - Spoke 6 - Evidence and impact of multimorbidity on active life: analysis on the Share data

- **scientific coordinator and tutor**: Prof.ssa Agar Brugiavini
- **duration**: 10 months, starting from January 2025
- **SSD**: ECON-01/A; **GSD**: 13/ECON-01

abstract:

Age is an important determinant of the onset of multimorbidity for older people. The effects are relevant, as this is an early signal of fragility, which might end up in a case of lack of autonomy. Furthermore multimorbidity affects the working life of individuals. Hence, it is important to explain the dynamics of multimorbidity and work, investigating its effects on good quality data such as the Share data. This is within Spoke 6, Work Package 2 (several tasks).

Stipend: The research fellowship amounts to **16.000,00=.**Euros.

PROFILE 2 - Spoke 6 - Active ageing index: analysis on the Share data

- **scientific coordinator and tutor**: Prof.ssa Agar Brugiavini
- **duration**: 10 months, starting from January 2025
- **SSD**: ECON-01/A; **GSD**: 13/ECON-01;

abstract:

Active Ageing indexes are multidimensional indexes which have been developed in comparisons across countries or across regions (see for example OECD), they allow to study the effects of policies earmarked to older people. However, they have not been developed at the individual level because they require a very rich set of data with details about health, work, family composition

etc... The study will construct these indexes on good quality data such as the Share data. This is within Spoke 6, Work Package 2 (several tasks).

Stipend: The research fellowship amounts to **16.000,00=.**Euros.

PROFILE 3 - Spoke 6 - Evidence on poverty and educational poverty: a comparison across generations

- **scientific coordinator and tutor:** Prof.ssa Agar Brugiavini
- **duration:** 10 months, starting from January 2025
- **SSD:** ECON-01/A; **GSD:** 13/ECON-01;

abstract:

Poverty can manifest itself in various ways also depending on the needs that emerge at different ages. One basic element of the so called “socio-economic-status” SES of individuals is education, as this determines access to different opportunities. The study compares poverty and educational poverty across generations, this is within Spoke 6, Work Package 2 (several tasks).

Stipend: The research fellowship amounts to 16.000,00 Euros.

PROFILE 4 - Spoke 10 - Budget policy choices and public expenditure for the elderly in Italian Municipalities

- **scientific coordinator and tutor:** Prof.ssa Francesca Zantomio
- **duration:** 10 months, starting from January 2025
- **SSD:** ECON-03/A; **GSD:** 13/ECON-03.

abstract:

Social spending by local public bodies, and, in particular, municipalities in favor of older people exhibits remarkable territorial disparities at a national level, which appear systematically related to the functional distribution of current expenditure, rather than primarily driven by the prevailing age distribution at the local level. For this reason, it is important to investigate the link between budget policy choice undertaken by municipalities and the resulting amount of local public expenditure devoted to older people. This module of work will bring forward this research question using the available data sources previously explored in the context of the same task 1.3 (Spoke 10).

Stipend: The research fellowship amounts to **20.000,00 Euros.**
