Università Ca'Foscari Venezia

Concorso pubblico, per titoli ed esami, per la copertura di n. 1 posto a tempo indeterminato di categoria C, posizione economica C1, area tecnica, tecnico scientifica ed elaborazione dati, per le esigenze di Radio Ca' Foscari dell'Ufficio Comunicazione Promozione di Ateneo - Area Comunicazione e Promozione Istituzionale e Culturale dell'Università Ca' Foscari Venezia., emanato con DDG n. 1074/Prot. n. 102149 del 24/10/2022, pubblicato con avviso in G.U. IV Serie Speciale – Concorsi ed Esami n.85 e all'Albo on line dell'Ateneo in data 25/10/2022.

TRACCE PROVA ORALE del 19 DICEMBRE 2022

TRACCIA 1

Cos'è il clock radiofonico e con quali criteri programmarne uno per una radio universitaria?

BOOKS OF THE YEAR, AND FOR CHRISTMAS…
Oxford people recommend their top book from the past year.
This book is one of the most thought-provoking works of history I have read in a long time. It is also thrilling, taking the reader on a journey back in time, to attempt to uncover truths around genocide, betrayal, assassination, and memory. We uncover the role of Mossad agents hunting an escaped Latvian in Uruguay, Herbert Curkurs, who although a Nazi collaborator implicated in mass murder of Jews, is today regarded as a national hero

Cosa si intende per E-learning?
E' il sistema con cui il computer aggiorna i propri programmi in automatico
E' una biblioteca on line
E' un'emeroteca on line
E' l'apprendimento a distanza attraverso internet

TRACCIA 2

Quali sono le principali piattaforme di podcasting utilizzate attualmente in Italia e quali lei sceglierebbe per la diffusione di artefatti destinati alla comunità accademica di Ca' Foscari?

The Symphony of the Brain
"We can think of singers in a choir as neurons in the brain. Like these singers, neurons have to work together to create harmony, and once they do, the results are magnificent!"
When neurons, or nerve cells, in the brain communicate with each other, they generate synchronised electrical activities known as brain waves. But what is the function of these

brain waves? Can we 'see' them? What happens if these collective activities go 'out of sync'? In this video, Demi Brizee, a PhD student in the Medical Research Council Brain Network Dynamics Unit at the University of Oxford, introduces us to the fascinating world of brain waves, and explains how a better understanding of them could lead to new therapies for neurological conditions.

Che cos'è "PowerPoint"?
Un programma di videoscrittura
Un programma Microsoft dedicato alla realizzazione di slideshow e presentazioni
Un programma di gestione fogli di lavoro
Un programma di gestione finestre

TRACCIA 3

Come strutturerebbe un itinerario formativo per giovani che desiderano accostarsi al podcasting e quali competenze svilupperebbe (ne elenchi almeno quattro)?

Should I feel guilty eating turkey at my Christmas dinner?
While the tradition of eating turkey at Christmas can be traced back to Henry VIII, it's really only been a staple part of our Christmas dinner since the early 20th Century. However, in the UK, it's now hard to imagine a Christmas spread without a turkey at its centre! But – with meat consumption linked to negative impacts on both our health and the planet – should we feel guilty about enjoying this part of the festive feast? In the opinion of social psychologist Elif Naz Çoker, the answer is no, you shouldn't feel guilty – turkey is a wonderful treat for a special occasion.

TRACCIA 4

Qualora lei dovesse completare un palinsesto di una radio universitaria e non avesse sufficiente materiale audio prodotto autonomamente (artefatti contenenti musica, programmi, notiziari, etc.) a quali fonti attingerebbe e con quali criteri?

Art & Algorithms – new exhibit highlights differences between algorithmic and human curation

As algorithms infiltrate our visual culture, what impact do they have on how audiences perceive creative content? University of Oxford researchers question the role of algorithmic curation in a forthcoming London exhibit.

In the past months, the rapid deployment of generative AI technology such as DALL-E2, Stable Diffusion and Midjourney have led to fever-pitched speculation about the future of art in the face of automation. Whilst generative AI technology has received plentiful attention, little is known about the cultural impacts that algorithmic recommendation platforms have on visual culture.

TRACCIA 5

Quali associazioni di categoria potrebbero supportare attualmente una radio universitaria per quanto riguarda rappresentanza e gestione ordinaria e con quali modalità questo supporto potrebbe concretizzarsi?

Oxford Policy Engagement Network (OPEN)
OPEN is a growing network of researchers, doctoral students and professional services staff at the University of Oxford who share a vision of public policy powered by the world's best available research evidence and expertise.
Our mission is to equip ourselves and each other to share knowledge and expertise with the policymaking community so that, together, we can contribute to better policies that protect what is valuable and change the world for the better. To this end, OPEN connects researchers across the University with opportunities to engage with the policymaking community locally, nationally and internationally.
Find out more about policy engagement at Oxford here. You can also follow the OPEN on twitter.
