**Andrea Gambarotto**

# **The Dialectics of Social Cognition: An Enactive Account of Labour**

**Chair: Tommaso Guariento**, postdoc ERC project  
AIMODELS

Enactive approach in cognitive science can help understanding the complexity of social cognition. The main argument is that this requires also integrating dialectical tools into the perspective of the embodied mind. Individualist models of cognition are challenged for failing to account for the inherently social and interactive nature of cognitive processes. Labour is analysed as an exemplary case of socially distributed and ecologically extended cognition.

**Guest hosted by the ERC  
AIMODELS GA n. 101088645.**

**Funded by  
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or ERCEA. Neither the European Union nor the granting authority can be held responsible for them. GA n. 101088645.

**Andrea Gambarotto** is an FNR research fellow at the University of Luxembourg and chief researcher of the AUTONOMY project, which integrates dialectical and enactive approaches to cognition. He is also the founder and editor-in-chief of Dialectical Systems, a forum on biology, ecology, and cognitive science.
