

Is it still possible to open a green window of opportunities in the EV sector? Evidence from FDI in the automotive sector

Wednesday, October 22, 2025, 2.30 - 4.00PM

By **Guendalina Anzolin**, Research Associate at the Institute for Manufacturing, University of Cambridge

The global shift to Electric Vehicles (EVs) is driven by new industrial policies. This seminar will present a new study that applies the green windows of opportunity (GWO) framework to examine the role of Foreign Direct Investments (FDIs) in this transition. Using a network analysis of global FDI flows, the research investigates whether new countries are emerging in the EV sector. The findings reveal that, despite some changes, established incumbents still dominate FDI, confirming the significant challenges new entrants face in opening a green window of opportunity.
