Prof. **Bjarne Stroustrup**
Columbia University, New York, U.S.A.

21ˢᵗ Century C++

11 May, 2026, 3.30 pm
Campus Scientifico, Auditorium Mainardi
and online

Bjarne Stroustrup, the inventor of the C++ programming language, will present C++ as a coherent whole where strongly-typed generic programming has a central role, where code is presented as modules, resources are never leaked, and error-handling is systematic. The talk will be preceded by a short presentation of the master's in Computer Science and Information Technology at Ca' Foscari University.
