Shaping China's Ageing Futures: Socio-Economic Challenges, Cultural Transformation and Governance Innovations

Tuesday, 23 June 2026, 10.30-12.00
Meeting Room 1, San Giobbe Campus

This seminar explores the social, cultural, and economic transformations shaping contemporary China through a sociological lens. Professor Chen Yanjiao will discuss population ageing, age-friendly communities, and the changing relationship between social development and cultural change. Dr. Mark Awe Tachega will examine innovative methodological approaches to sociological research, including the use of machine learning and advanced statistical techniques for survey analysis. Together, the speakers will offer insights into the challenges and opportunities arising from demographic transition, governance innovation, and evolving social structures in China.
