Tentative Programme

General Assembly – 12–13 October 2026

Campus Scientifico Ca' Foscari | Via Torino 155, 30170 Venezia Mestre

The General Assembly (GA) is conceived as a series of focused sessions addressing key “Moonshots” identified by the European Commission in view of the upcoming FP10 – Horizon Europe programme. The primary objective is to foster the creation of dedicated working groups that will initiate and support future collaborative activities in these areas. Contributions of new ideas and proposals will be strongly encouraged throughout the meeting.

At present, four main thematic areas have been identified:

- **Quantum Computing**
 - **Synthetic Biology, Artificial Life, and Living Technologies**
 - **Intelligent Soft Matter**
 - **Biomedical Applications of Artificial Intelligence**
-
