One of the largest international media art festivals, CYFEST
was founded in St. Petersburg in 2007 by independent artists
and curators. The festival promotes the emergence of new
forms of art and high technology interactions. CYFEST’s goal
is to develop professional connections between artists,
curators, engineers and programmers around the world to
expose wide audiences to robotics, video, sound and net art.
Over the last decade, CYFEST has featured artists from
Russia, USA, Germany, Japan, Canada, Argentina, Brazil,
Finland, Italy, the Philippines among other countries.
