## Biological and cultural diversity in the context of European vulnerable ecosystems

This two-day international workshop aims to discuss different aspects of the human-nature interaction in the context of European vulnerable ecosystems.

Particularly, it would address the crucial importance of biological and cultural diversity for the sustainability, durability and resilience of the wetlands and mountain areas in several countries of Western and Eastern Europe.

Several early-career scholars will present their current researches and together we will discuss about vulnerability, resilience, and the importance of a holistic perspective in ecosystem management.

Indeed, we will bring together knowledge from different disciplines including environmental sciences, biology, chemistry, anthropology, history, policy.

Join this workshop to exchange ideas about resilience and vulnerability in different ecosystems across Europe, to exchange experiences and know-how, and to visit some hidden natural pearls of the Venice Lagoon with expert guides.

## Two-day workshop in English

### March 19<sup>th</sup> 2020

Workshop “Biological and cultural diversity in the context of European vulnerable ecosystems” at Scientific Campus in Mestre

Via Torino 155 Room 0A – ground floor Delta Building

Schedule: **9:30 – 17:30**

Workshop and coffee breaks included

### March 20<sup>th</sup> 2020

Visit and discussion in WWF Oasis of Valle Averte (VE) and in R.N.I. di Bosco Nordio (VE) – departure from Campus Scientifico Mestre Via Torino 156 (VE)

Schedule: **8:00 – 18:30**
