

Bio

Barbara McGillivray is lecturer in digital humanities and cultural computation at King's College London and Turing fellow at The Alan Turing Institute, where she runs the Data Science and Digital Humanities special interest group. She holds a degree in Mathematics and one in Classics from the University of Firenze (Italy), and a PhD in Computational Linguistics from the University of Pisa (2010).

Her current research focusses on computational models of meaning and conceptual change in historical and contemporary texts and she is Co-Investigator of the Living with Machines project. She is also very interested in supporting open data in Humanities research and has been editor-in-chief of the Journal of Open Humanities Data since 2019. Her most recent book is *Applying Language Technology in Humanities Research. Design, Application, and the Underlying Logic* (co-authored with Gábor Mihály Tóth, Palgrave Macmillan 2020).
