# Unruly Natures

This seminar, facilitated and hosted by the Ecological Art Practices research cluster at NICHE (Cristina Baldacci and Emiliano Guaraldo), will reflect on methods from the environmental humanities and political ecology, as seen through the lens of the activities carried out by Unruly Natures in the Upper Valais (2021) and Zurich (2022). The idea is to initiate a conversation on a third edition of Unruly Natures dedicated to the Venetian Lagoon in Autumn 2023.
