

My name is Sebastian Richiano, I am from Argentina and have a degree in Geology (2006) of the Faculty of Natural Sciences of the National University of La Plata, (Argentina), a PhD in Natural Sciences (2012) at the same university. In 2018 I was postdoc of CONICET (Argentina) at the University of Alberta (Canada). Since 2014 I am a researcher of CONICET, working on sedimentology and ichnology of marine sequences of different geological ages. I did teaching and research activities at National University of La Plata (Argentina) between 2009 and 2017; and since 2020 I do the same at the National University of La Patagonia (Argentina). Between 2018 and 2020 I was the main editor of Latin American Journal of Sedimentology and Basin Analysis and the secretary of Argentinean Association of Quaternary and Geomorphology. In the last 20 years I have participate in more than 20 national and international projects, 65 presentations in congresses and published 61 research papers in national and international journal, among others: Quaternary International, Geobiology, Palaeo-3, Marine and Petroleum Geology, Lethaia, Global and Planetary Change, Nature Communications, Journal of Marine Systems, Marine and Freshwater Research, Historical Biology.

At the moment I have an INQUA Fellowship to work at the Ca'Foscari University of Venice with the Prof. Alessio Rovere and his team in the reconstruction Late Quaternary sea-level changes in the Western Mediterranean.
