Faculty of Science and Engineering, Laboratory of Industrial Chemistry and Reaction Engineering, Åbo Akademi - Turku, Finlandia

Structured catalysts and reactors – *quo vadis?*

25 novembre 2024 ore 11.00

Sala Conferenze A.A. Orio & G. Zanetto

Tapio Salmi is a researcher in the field of chemical reaction engineering and he works as a Professor of Chemical Reaction Engineering at Åbo Akademi and visiting professor at Università di Napoli 'Federico II'. During the years 2009-2013 and 2019-2023 he served as Academy Professor appointed by Academy of Finland. Professor Salmi's research focuses

especially on chemical engineering phenomena, reaction kinetics and catalysis as well as on intensification of chemical processes, reactor design, and innovative biomass refining. He is the author and co-author of around 700 scientific articles and four textbooks. He has supervised 70 doctoral theses in the fields of catalysis and reaction engineering.
