Cutting the Mass Line Water, Politics, and Climate in Southwest China

Andrea E. Pia

London School of Economics
and Political Science LSE

5 May 2025
h 16:00

China is experiencing climate whiplash—extreme fluctuations between drought and flooding—that threatens the health and autonomy of millions of people. Set against mounting anxiety over the future of global water supplies, *Cutting the Mass Line* explores the enduring political, technical, and ethical project of making water available to human communities and ecosystems in a time of drought, infrastructural disrepair, and environmental breakdown.
